

ENHANCED KEY COPY CONTROL

With Mul-T-Lock®, unauthorized key duplication is significantly reduced thanks to advanced key copy control measures.

As a globally trusted brand, Mul-T-Lock® offers premium, patented cylinder platforms, with key duplication available through our authorized dealer network.

The MTL™700 key copy control system uses a unique magnetic-strip card that stores your encrypted key code. Additional keys can be duplicated by presenting the original magnetic card to an authorized Mul-T-Lock® partner equipped with a certified key-cutting machine.

In addition, the use of rotating magnetic elements makes the MTL™700 key extremely difficult to reproduce using 3D printing technologies, boosting protection.

About Mul-T-Lock®

For over five decades, Mul-T-Lock® has been a global leader in developing, manufacturing, and marketing high-security access solutions for institutional, commercial, industrial, and residential applications.

Mul-T-Lock® offers a wide range of high-security, high-quality locking solutions and holds dozens of international patents for our innovative, user-friendly products. Our solutions provide safety, security, and convenience to millions of people worldwide.

Mul-T-Lock® is fully owned by the ASSA ABLOY Group, a worldwide leader in access solutions. With a proven track record of innovation, ASSA ABLOY helps billions of people experience a more open world by enabling safe, secure, and convenient access to physical and digital spaces.

MTL™700

Built on a foundation of the trusted telescopic pinning mechanism, Mul-T-Lock's MTL™700 cylinder platform delivers high security with its patented rotating magnetic elements technology.

Each MTL™700 key features two unique rotating magnets that interact with the magnetic components in the cylinder.

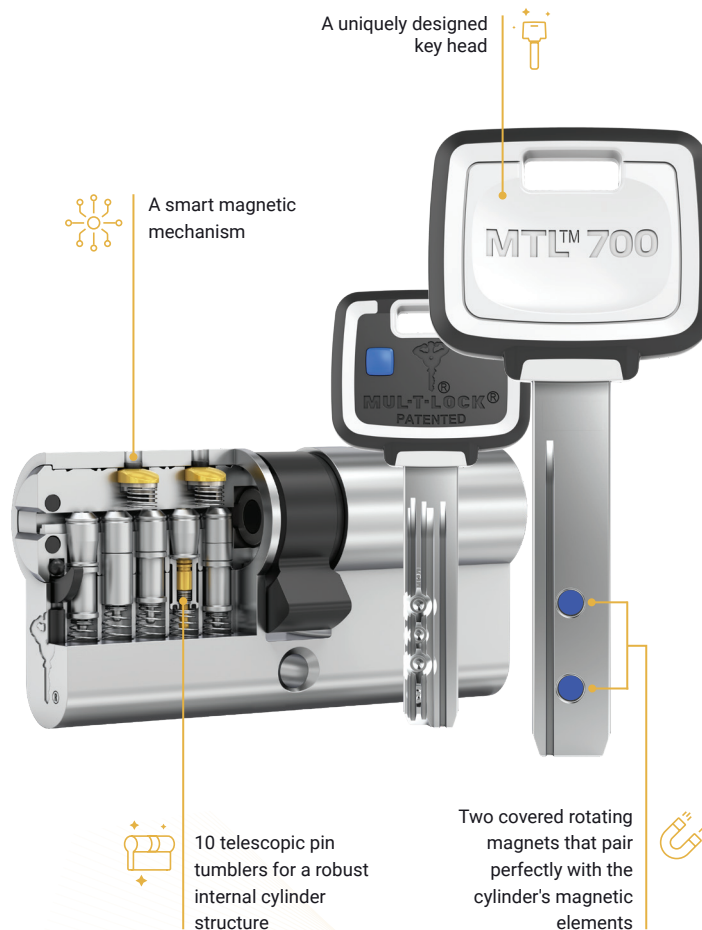

This dynamic mechanism adds an extra layer of protection, disrupting both traditional and advanced forms of lock manipulation.

A UNIQUE KEY HEAD DESIGN

The MTL™700 features a unique double-mold key head, designed for intuitive operation.

An indentation on one side of the key head helps users quickly identify the right insertion side with a single touch!

FLEXIBLE KEYING OPTIONS

The patented MTL™700 cylinder platform supports a wide range of advanced keying options to meet the security needs of any home or organization:

- Keyed Different
- Keyed Alike
- Master Keyed

MTL™700 facilitates large and complex master key systems, including hierarchical and matrix structures, all within a single suite.

Mul-T-Lock's Master Key Systems (MKS) are designed to scale with your evolving requirements — allowing a single master key to unlock all or selected doors. This significantly reduces the number of keys in circulation while enabling more dynamic and efficient access control.
